SQUASH CHEESE BALLS

EXECUTIVE SUMMARY

Squash Cheesy Balls is a proposed student business that offers an affordable and delicious snack made from squash, cheese, and other ingredients. The product combines the natural taste of squash with the savory flavor of cheese, creating a unique snack that can be enjoyed by students, teachers, school employees, and other customers.

The business aims to provide quality snacks at a reasonable price while promoting creativity, teamwork, and entrepreneurship. It will focus on using fresh ingredients, maintaining cleanliness, and ensuring customer satisfaction. The proposed business location is near Eastern Samar State University (ESSU) Main Campus in Maypangdan, Borongan City, Eastern Samar, subject to school approval and applicable requirements.

The business will use simple marketing strategies, such as word-of-mouth promotion, attractive packaging, and social media advertising, to attract customers. The student group will manage the production, marketing, sales, and financial records to ensure that the business operates properly.

Squash Cheesy Balls aims to earn a reasonable profit while providing customers with a tasty and budget-friendly snack. Through this business project, the group hopes to develop entrepreneurial skills, gain business experience, and learn the importance of teamwork, responsibility, and proper financial management.

BUSINESS DESCRIPTION

MARKET ANALYSIS

INDUSTRY OVERVIEW

The food industry in the Philippines continues to provide opportunities for affordable and convenient snacks. Squash Cheesy Balls offers a unique combination of squash and cheese that can attract customers looking for a tasty and budget-friendly snack. Its simple ingredients and convenient serving make it suitable for students, teachers, and other customers.

TARGET MARKETING DEMOGRAPHIC

AGE RANGE: Students, teachers, school employees, and families who enjoy affordable and delicious snacks.

LOCATION: The proposed selling area is near Eastern Samar State University (ESSU) Main Campus in Maypangdan, Borongan City, Eastern Samar, subject to school approval.

LIFESTYLE: Busy students and employees who prefer convenient snacks during breaks or after school and work.

COMPETITION

The main competitors are nearby food stalls, school canteens, and vendors selling fried snacks, bread, and ot

SWOT ANALYSIS

STRENGTHS

1. Unique combination of squash and cheese.
2. Affordable and convenient snack for students and other customers.
3. Simple product concept that allows creativity in preparation and presentation.

WEAKNESSES:

1. Limited product variety during the initial stage.
2. Ingredient prices may change and affect production costs.
3. The business may have limited capital and production capacity.

OPPORTUNITIES:

1. Potential demand for affordable and enjoyable snacks.
2. Opportunities to promote the product through social media and word of mouth.
3. Possibility of introducing different flavors or product variations in the future.

THREATS:

1. Competition from other snack sellers.
2. Changes in ingredient prices.
3. Changes in customer preferences and demand.

MARKETING AND SALES STRATEGY

BRANDING

Squash Cheesy Balls is presented as a creative and affordable snack that combines squash and cheese. The business aims to build customer interest through its distinctive product, attractive packaging, and consistent quality.

PROMOTIONS

The group will promote the product through word of mouth, product photos, posters, and social media platform

ESTIMATED SALES GOALS

Week 1: The target is to sell 200 pieces of Squash Cheesy Balls per week, or approximately 42 pieces per day.

Week 2: The target is to sell 300 pieces of Squash Cheesy Balls per week, or approximately 58 pieces per day.

OPERATION PLAN

LOCATION

The business will operate near Eastern Samar State University (ESSU), making Squash Cheesy Balls accessible to students, teachers, and other customers.

FACILITIES

The business will provide a clean and organized preparation and selling area, with proper storage for ingredients and packaging materials.

PRODUCTION PROCESS

Prepare the Ingredients – Wash, peel, and prepare the squash and other ingredients.

Mix the Ingredients – Combine the squash, cheese, flour, and seasonings until well mixed.

Shape the Balls – Form the mixture into small balls and add cheese filling if desired.

Cook the Product – Fry the balls until golden brown and crispy.

Drain and Serve – Remove excess oil, allow them to cool slightly, and pack them for serving.

INVENTORY MANAGEMENT

The business will regularly check and monitor the supplies of squash, cheese, flour, breadcrumbs, and other ingredients to ensure they are fresh and available for production. Proper storage will be practiced to prevent spoilage, reduce waste, and control expenses..

QUALITY CONTROL

The business will ensure that every Squash Cheesy Ball is fresh, delicious, and properly cooked. The team wi

MANAGEMENT AND ORGANIZATION

Ownership

Squash Cheesy Balls is owned and managed by a team of students who work together to operate and develop the business. Each member has assigned responsibilities in production, marketing, sales, and financial management to ensure smooth operations and business growth.

Roles and Responsibilities

CEO: **Sucatan, Jhelanz O.** - Oversees the entire business and makes important decisions.

Squash Cheesy Balls requires an initial investment to cover essential business needs. The start-up cost includes equipment, initial ingredients, packaging materials, marketing and branding, and working capital. Overall, the business aims to manage its finances efficiently, provide affordable and delicious products, and achieve a stable profit.

PROJECT DAILY EXPENSES

Expenses Category	Estimated Daily Cost
Squash	₱74
Flour	₱30
Cornstarch	₱30
Breadcrumbs	₱36
Paprika	₱20
Cheese	₱22

Black pepper	₱15
Mayonnaise	₱34
Ketchup	₱20
Cheese	₱22
Salt	₱6
Cooking Oil	₱200
Egg	₱10
Squeeze Bottle	₱30
Butane	₱50
Stick	₱30
Peeler	₱40
Tong	₱40
Estimated Total Cost	₱700

The projected daily expenses for making Squash Cheesy Balls amount to an estimated total cost of ₱700. This budget covers the ingredients and materials needed for daily production. The main ingredient is squash (₱74), while flour (₱30), cornstarch (₱30), and breadcrumbs (₱36) help create the desired texture and crispiness. Paprika (₱20), cheese (₱22), black pepper (₱15), and salt (₱6) are added to enhance the flavor of the product.

Additionally, mayonnaise (₱34), ketchup (₱20), and cheese powder (₱22) provide extra taste and flavor. Cooking oil (₱200) is essential for frying, while eggs (₱10) help bind the ingredients together. Squeeze bottles (₱30), butane (₱50), sticks (₱30), pepper (₱40), and tongs (₱40) are also included as materials and equipment needed for preparation, cooking, and serving. Overall, these expenses cover the necessary ingredients and materials to produce delicious, crispy, and flavorful Squash Cheesy Balls.

Estimated Revenue

₱10.00 × 100 pcs × 2 days = ₱2,000

Gross Profit

₱2,000 – (₱700 * 2 days) = ₱582

Selling price per squash cheese ball: ₱10.00

Cost per piece: ₱7.09

Profit per piece: ₱2.91

Estimated pieces sild per day: 100

Working days: Tuesday/Thursday(2days/week)

The selling price per Squash Cheesy Ball is set at ₱10.00, while the estimated cost per piece is ₱7.09 based on the daily expenses of ₱709 for 100 pieces. This gives an estimated profit of ₱2.91 per piece. With 100 pieces sold per day for two days a week, the business can generate total sales of ₱2,000 and an estimated gross profit of ₱582 for the two selling days, assuming the full ₱709 is spent each day.

From this, the business can earn an estimated gross profit of ₱291 per day, showing that Squash Cheesy Balls

REVENUE FORECASTS:

Phases	Sold	Total Sales	Total Cost (₱7.09 each)	Gross Profit	Profit per piece
Phases 1(₱10.00 each)	200pcs	₱2,000.00	₱1,418.00	₱582.00	₱2.91
Phases 2 innovation (₱10.00 each)	300pcs	₱3,000,00	₱2.127.00	₱873	₱2.91

The table shows Squash Cheesy Balls' sales and profit performance for two phases. In Phase 1, selling 200 pieces at ₱10 each over two days generates total sales of ₱2,000 and an estimated gross profit of ₱582, based on a production cost of ₱1,418. In Phase 2- innovation, selling 300

pieces at ₱10 each generates projected total sales of ₱3,000 and an estimated gross profit of ₱873, assuming the production cost remains ₱7.09 per piece.

FINANCIAL HIGHLIGTHS

Squash Cheesy Balls shows potential for generating income and growing as a small business. In Phase 1, the business is projected to earn a gross profit of ₱582 from selling 200 pieces at ₱10 each. In Phase 2 – Innovation, the business is projected to earn a gross profit of ₱873 from selling 300 pieces at the same price.

The increase in projected sales from 200 to 300 pieces shows the potential for business growth. By maintaining product quality, controlling production costs, and providing affordable and delicious Squash Cheesy Balls, the business aims to attract more customers and increase its earnings.

These calculations assume the ₱700 expense covers the production of 100 pieces. If some items in your expense table, such as tongs and squeeze bottles, are reusable, the actual production cost per piece may be lower.

MENU WITH PRICING STRATEGY

PRICING STRATEGY

Squash cheese ball used Cost-plus pricing strategy to set its selling price.

Cost-plus pricing is a pricing strategy in which the selling price of a product is determined by adding a markup to the product unit cost. This method helps the business cover production expenses while earning a reasonable profit.

COG per squash cheese ball - ₱7.09

Mark up rate = 41%

Mark up =₱2.91

Retail Price = ₱7.09 + ₱2.91= ₱10.00

Rounded to a practical selling price for customer: ₱10 per piece

We used the formula:

Retail price = Cost of goods + Markup

COST PER SQUASH CHEESE BALL:

Total Cost of production (Cost of Goods) = ₱700

Total Pieces Produced = 100 pieces

$$\text{Cost per piece} = \frac{\text{Total Cost of Production}}{\text{Number of Pieces}}$$

$$\text{Cost per Pieces} = \frac{₱700}{100} = 7.09$$

Based on the estimated production cost, each squash cheesy ball cost ₱7.09 to produce, allowing the business to earn ₱2.91 per piece at a selling price of ₱10.00.

LEGAL & REGULATORY CONSIDERATIONS DOSSIER

Product: Squash Cheesy Balls (Crispy Outside, Cheesy Inside) | **Category:** Snack Retail / Food Enterprise

1. PRIMARY BUSINESS REGISTRATION REQUIREMENTS

- **DTI Business Name Registration:** Register "Squash Cheesy Balls Food Enterprise" under Sole Proprietorship (Act 3883) for national protection of the trade name.
- **BIR Registration (Form 1901 & ATP):** Secure Tax Identification Number (TIN), Certificate of Registration (BIR Form 2303), and Authority to Print official receipts for tax compliance.
- **Barangay & Zoning Clearances:** Prerequisite local clearances verifying commercial authorization at the production site/kiosk location.

2. FOOD SAFETY & HEALTH CODE COMPLIANCE

- **Sanitation Code of the Philippines (P.D. 856):** Annual Sanitary Permit required for the preparation facility. Clean potable water testing is mandatory.
- **Food Handler Health Cards:** All personnel shaping, cooking, or serving squash cheesy balls must undergo chest X-ray and medical screenings to obtain a valid City Health Card.
- **Food Safety Act of 2013 (R.A. 10611):** Implement strict storage temperature controls—cheese dairy inputs held below 4°C, deep frying oil maintained at 175°C to 190°C.
- **FDA Certification:** Direct kiosk sales require LGU permits. If selling pre-packaged frozen squash cheesy balls to grocery stores, an FDA License to Operate (LTO) and Certificate of Product Registration (CPR) are required.

> **Allergen & Packaging Mandatory Disclosure (R.A. 7394):**
> Package labels must explicitly state: *"CONTAINS: DAIRY (CHEESE) AND GLUTEN (WHEAT FLOUR)."* Include net weight, manufacturing date, and best-before date.

3. ENVIRONMENTAL & OPERATIONAL RISK MANAGEMENT

- **Fire Safety (R.A. 9514):** High-temperature deep frying and LPG lines require a certified Class K or ABC Fire Extinguisher on-site to obtain the Fire Safety Inspection Certificate (FSIC).
- **Grease Waste Management (R.A. 9003):** Used cooking oil must not be discharged into public drainage. Kitchen sinks must feature a grease trap, with waste oil collected by licensed handlers.
- **Intellectual Property (R.A. 8293):** Trademark registration of the brand logo and name with IPOPHL to safeguard enterprise assets.
